

HB 650 -- MOTORCYCLE LIGHTING (Cornejo)

COMMITTEE OF ORIGIN: Standing Committee on Transportation

This bill allows a motorcyclist to use amber and white illumination, standard bulb running lights, or light-emitting diode pods and strips while operating a motorcycle. The lighting must be non-flashing, non-blinking, non-oscillating, and directed toward the engine and drive train of the motorcycle to prevent interference with the motorcyclist's operation of the motorcycle.
